Powder plant Facilities

Double Cone Blender

Our **double cone blender** is made of premium quality raw material & renowned for function with precision in its various applications. It is an efficient blending machine for mixing dry powder and granulates homogeneously.

Features

Capacity - 10 to 250 kg

Ideal for powder mixing of dry powder and granules.

Mass Mixer

Designed to perfection for thorough mixing, **Mass mixer** is easy to clean and maintain and is equipped with safety transparent dust cover & has specially designed self-adjusting sealing arrangement, which ensures that no black particles enter the mixing drum.

Features

Capacity - 300 kg

Ideal for dry & wet material uniform mixing

Powder Filling Machine

Powder filling machine has been specifically designed to provide hassle free functioning for dry powder and external dry syrup filling. This machine is renowned to provide optimum production with minimum weight variation.

Features

Suitable for all free flowing powders & granules.

High filling accuracy, due to unique design features.

Microprocessor based controls.

Zero dripping.

Accurate slippage control.

Liquid Plant Facilities

The company has very large scale manufacturing facilities in its class and *highest capacity in liquid formulation* in nearby Gujarat region (1500 Liter / Batch).

The Silverson mixer homogenizer is used for the manufacturing of liquid and suspension type of formulations. The batch reactor is equipped with 7.5 HP Motor with adjustable control for upward downward movement (Telescopic stand).
